ABOUT ZEREK

The Zerek range of specialized rods is designed to re-define the concept of conventional luring rods for both fresh and light saltwater use and will continue to evolve to exceed your demands and expectations.

The first thing that you will notice when you pick up a Zerek rod is its lightness. These rods are so light that you can use your wrist to easily manipulate your lures throughout the day. Excessive weight reduction also compliments sensitivity which is paramount in this game.

Balancing is achieved mainly by adding counterweight at the butt-end of the rod. Although this is an additional weight, a balanced rod feels lighter than an unbalanced one. A balanced rod empowers you with greater control during casts and over-all maneuverability. At the end of a hard day's fishing, you will feel much less fatigue.

Ergonomics of Zerek Rods is achieved by carefully studying the optimum handle and reel seat design to suit as we all know the hand is the interface between the angler and his rod. It takes awhile for someone to appreciate it but once you become aware of its significance, you will not settle for anything less.

NAGINATA なぎなた

The 2015 Zerek Naginata Rod design combines several features that are essential for the Finesse Concept. Built with carbon wrapped blanks, these fast action rods are mid-jointed for easy portability without compromising on the rod's length and strength. A shorter butt - an adaptation of the classic pistol grip, allows for easy casting in tight quarters when a fast reload, low trajectory and accuracy are required. Quality Fuji components further enhance the overall performance of these lightweight and sensitive rods.

Features

- Custom fuji ® reel seat
- Fuji ® SiC guides
- Tuned lightweight handle
- Multi-modulus carbon construction
- Custom end cap

ZEREK RODS

Amazoniac

Here, the generic equation of stiffness equals strength does not apply. Stiffness is directly proportional to the modulus of carbon but carbon itself does have inherent limitation. Our design process had proven that there are directions where we could not only strengthen our Amazoniac rods, but also increase sensitivity and responsiveness without adding on extra weight.

Amazoniac

Arachne

Arachne is the new member of the Amazoniac family. The soft tip of Arachne was designed to effectively “Walk the Dog” without disrupting it’s zigzag motion like a rod with stiffer tip would. Arachne is also effective for working light lures and soft plastics where a softer tip is needed to launch the lures.

Features

- Fuji ® SIC guides
- Fuji ® exposed reel seat
- EVA with Cork split handle
- Available in baitcast model

ZEREK RODS

T-SERIES

Utilizing Rare Carbon materials and finished with a Helical Construction, this series of Tamer and Temptress rods are design for Light Game targeting in-shore reef and pelagic species. Modern design and outstanding performance custom concepts for the Light in-shore Game enthusiasts

TAMER

LIGHT JERKER

Saltwater Light Jigging Game

Simply stated, the design focus of the Tamer Series is in the jig presentation and hook-set. Unlike other jigging rods, which utilize carbon or glass fibers that result in the rods being too stiff to work a jig properly or too soft to deliver a solid hook-set.

The Tamer Light Jerker uses a secret blend of High and Mid-Modulus Graphite fibers carefully wrapped in controlled number of layers at different proportions of the blank itself. Doing this has produced a rod that can present a jig effectively and at the same time have enough power to stop any good fish.

Features

- Fuji ® KLSG and KTSG guides
- Fuji ® Reel Seat
- Lightweight split handle

TAMER

LIGHT JERKER FINNESSE

Simply stated, the design focus of the Tamer Series is in the jig presentation and hook-set. Unlike the other competition which uses either carbon or glass fibers in their rods, making it either too stiff to work a jig properly, or too soft to deliver a solid hook-set.

The Tamer Light Jerker Finnesse uses a secret blend of High and Mid-modulus Graphite Fibers carefully wrapped in controlled numbers of layers at different proportions of the blank itself. Doing this has produced a rod that can present a jig effectively and at the same time have enough power to stop any good fish.

TEMPTRESS

ADRENALINE

Saltwater Light Popping Game

What makes the Temptress Series so awesome is its lightness and power. Instead of constructing the blank using conventional materials, we eliminated unnecessary bulk by utilizing high quality Japanese carbon cloth for its construction. Complete with the latest Fuji ® Concept Guides, resulting in longer casts in any situation.

The responsive tip compliment by a progressive taper made the Temptress Adrenaline a very formidable casting and fish fighting instrument.

Features

- Fuji ® KWSG guides
- Fuji ® Reel Seat

(LWMS)

WONDER MINNOW

あなたの情熱に火を付けます

ORIGIN SERIES

IGNITE YOUR PASSION

Wonder Minnow (LWMS) resembles the profile of most baitfish. With a dressed-up rear treble for the most balanced swimming action, it displays a wide S action on steady retrieval. Abrupt jerking of the rod tip enables Wonder Minnow to exhibit the sharp darting action of a fleeing baitfish, provoking an onslaught by any predator. The larger deep diving model (LWMM) dives to a depth of 4-5m, seeking out bottom dwelling species.

This broad-spectrum hard-bodied lure boasts an internal weight transfer system that ensures optimum casting distance, covering larger area to maximize strike count.

ITEM	TYPE	SIZE(mm)	WEIGHT(g)	DEPTH(m)
781-LWMS85F	FLOATING	85	11	1.0-1.3
781-LWMM100F	FLOATING	100	17	4.0-5.0

(LGK)

The structured body cavity has a unique steel ball system which creates different rattles which appeals to more predatory fish.

GECKO

あなたの情熱に火を付けます

ORIGIN SERIES

IGNITE YOUR PASSION

The Zerek Gecko is the latest walk-the-dog pencil in the Zerek family. With custom designed contours to present a large surface area when viewed from below, the presence of this lure is evidently felt the moment it hits water. The wide sweeping action of this lure covers an extended area as it glides on the water surface. The internal compartment of the lure is fitted with multiple stainless steel bearings to create an incessant rattling noise that infuriates predators from far away and trigger them to burst to the surface for an attack.

The high buoyancy of this awesome surface lure permits the use of heavy duty trebles to give you added confidence while wrestling predators away from their underwater dungeons.

(LGRB)

GIANT RUBY

あなたの情熱に火を付けます

ORIGIN SERIES

IGNITE YOUR PASSION

The Zerek Giant Ruby is a deep diving crank bait that is ideal for fishing at depths of up to 5 meters. It has a tight wobbling action and floats on the pause making it easy to navigate through areas with underwater structure. The bib design allows the lure to get down to its optimal depth quickly and maintains a forward angled position to reduce snagging. Constructed with ABS, The Giant Ruby has a slimmer body profile and a magnetic weight transfer system that ensures excellent castability.

ITEM	TYPE	SIZE(mm)	WEIGHT(g)	DEPTH(m)
781-LGRB75C	FLOATING	75	28	4.0-5.0

ZEREK LURES

Finesse fishing is rapidly gaining popularity and is embraced by anglers all over the globe as the solution to increasing productivity in areas where fishing pressure is high. The art of enticing reluctant fish to strike by downsizing tackle, line and lures redefines the game, giving anglers an edge when fishing in these locations. The Finesse Craft Series boasts a combination of classic lure types designed for a specific application that are adaptable over a broad spectrum of fishing environments and fishing styles.

FCS BULLDOG

The latest addition to the Finesse Craft Series, the Zerek Bulldog is a 38mm floating crankbait that weighs in at only 4 grams. Ideal for targeting fish in shallow areas, this lure has a tight wobbling action as it dives during retrieval. Its forward profile also makes it less prone to snags as the bib knocks into structure, rising on the pause to trigger bites. Available in 10 colors to suit varying water conditions.

ITEM	TYPE	SIZE(mm)	WEIGHT(g)	DEPTH(m)
781-BDC38F	FLOATING	38	4	2

FCS TRAIL WEAVER

As the Origin Series Ze-Dog continues to fascinate top water enthusiasts, a smaller version of this legend is materialized in the form of the Trail Weaver in the newly developed Finesse Craft Series. This silent puppy is set to stir up a storm on the freshwater stage with its weaving runs. At 65mm, it will not intimidate cautious predators, and its wide angled zig zag movements remain visible even from the depths. As with the Ze-Dog, this little puppy promises respectable casting distances and ease of control.

ITEM	TYPE	SIZE(mm)	WEIGHT(g)
781-FWTW65TW	TOP WATER	65	6.0

FCS POPPARAZZI

The Popparazzi's unique triangular mouth cup is specially designed to ensure maximum water displacement without compromising the lure's stability. With an aerodynamic body shape that is bottom weighted for better casting, the Popparazzi maximizes your coverage of the fishing ground and the consistent trail of ripples will definitely turn on the most sluggish fishes on a slow day of fishing.

FCS TANGO SHAD

In areas where there is high fishing pressure and the predatory fishes are immune to exaggerated wobblers, this little floating shad has a big role to play. Available in four sizes, 40mm, 50mm, 69mm and 89mm, the Tango Shad is capable of diving to 2m depths and exhibits a tight wiggling action. With excellent buoyancy, this lure is very responsive in the water and on the other hand, relatively snag resistant. Incorporating pauses while the lure is worked at the bottom column of the water allows the bait to rise quickly, emulating the actions of a struggling baitfish thereby attracting the attention of any nearby predators.

FCS VENUS TRAP

0m

VENUS TRAP

A smaller cousin to the Rocker Vibe, this silent lure is specially designed for finicky and wary fishes residing in freshwater impoundments. The soft vibrations sent out by its subtle wriggling can only be detected by the acute senses of the fish lateral line, and naturally triggers reactive strikes of ambush predators, even in the most obscured water conditions. With the weight precisely located at the extreme front end of the lure, the specially designed system enables the lure to stand upright head-down in water to minimize snagging, while the heavy weight to length ratio ensures a long and accurate cast every time. This naturally translates to more coverage and better bite rates. In sluggish conditions, work the Venus Trap on the bottom with a slow retrieve and this small lure presents itself as a vulnerable and easy meal for slow moving predators.

PCS BARRA-X PRO

Zerek Innovation's new Barra X Pro series of lures incorporate a magnetic weight transfer system that increases distance and accuracy when casting, while retaining the original design of their extremely popular predecessor, the Barra X. Made from ABS with wire through construction, the Barra X Pro has a perfect blend of roll and wobble gives these lures a seductive swim action that is irresistible to predatory fish. Available in floating models in 100mm, 120mm and the new 170mm sizes, the lures work a targeted zone in the 0.6-1.2 meter depth making them ideal for shallow water applications. A new range of colours also enhance the visual aspect of the lures presentation to suit varying water and light conditions and fishing situations.

PCS LONG TRAIL

A must have for shore anglers; this aerodynamic lure casts like a dream, even in adverse wind conditions. Naturally suspending, this sub surface lure works between 60cm and 90 cm depths and rises slowly during pauses. Its slim profile closely matches the shape of bait fishes along the shore line. When worked with long jerks, its tight wiggling transforms into a series of erratic movements to imitate disoriented baitfish in the surf.

PCS RIPPER DIVER

Although this giant wobbler is designed with trolling in mind, the Ripper Diver incorporates a weight transfer system that enhances its casting distance. The attractive side to side wobbling is guaranteed to emanate brilliant flashes even in murky water conditions to entice predators residing in the depths. Available in 3 different sizes (90mm/110mm/130mm) and 3 different depths (1m/3m/5m), this family of wobblers would make fantastic search baits with the wide grounds covered thereby increasing the probability of a fish striking. The wide bib is precisely designed to keep a straight track when trolled, even in fast moving currents and its positive buoyancy minimizes snags with underwater obstacles.

AUSTRALIA EDITION #

PCS TIDE TRAIL

The Tide Trail displays a wide array of actions when worked in different ways. The micro lip of this versatile lure equips it with strong darting action. Short, sharp twitches with intermittent pauses emulate the erratic behaviour of a confused baitfish that is bound to invoke the interest of fast moving predators.

Slow jigging presents a natural fluttering action which mimics the action of an injured baitfish, while a slow steady retrieve presents a wide s-motion swimming action that most fishes find irresistible. In the hands of the imaginative angler, this versatile minnow provides endless opportunities in different fishing conditions.

ITEM	TYPE	SIZE(mm)	WEIGHT(g)
781-SWTT90S	SINKING	90	11.5

PCS FISH TRAP

A soft plastic vibe with a twist, the Zerek Fish Trap boasts a unique design that seamlessly integrates the functionality of a conventional vibe with the versatility of soft plastics. This allows for a wide range of applications over various types of terrain. Constructed with tear resistant TPE material, the Fish Trap is reinforced with wire internally to withstand bite force and prolonged use. The addition of a grub tail is another distinctive element in the Fish Trap's design that complements the vibration made by the lure as it is retrieved. The subtle movement of the grub tail, when the lure is at rest combined with the holographic eyes gives it a realistic appearance which predatory fish will find hard to resist.

ITEM	TYPE	SIZE(mm)	WEIGHT(g)
781FT65	VIBRATION	65	10
781FT95	VIBRATION	95	23
781FT110	VIBRATION	110	30

PCS LIVE SHRIMP

Constructed using a special rubber material, the soft legs of the live shrimp flutter on the drop and mimics the movements of a river shrimp to its true live form. A slow, straight retrieve is all it takes but an occasional twitch will further enhance its liveliness. The soft segmented body curls and straightens naturally when twitched. Complete with fluorescent “glow in the dark” eyes, this winner is ready to entice strikes in both day and night conditions. The versatile lure also allows you to work different terrains through different hook positions. Simply expose the hook to increase the chance of hook ups in open water or conceal the hook point for weedless applications.

781-LSMP3.5	SOFT BAIT	89	7
781-LSMP5.0	SOFT BAIT	127	15.5

PCS LIVE CHERABIN

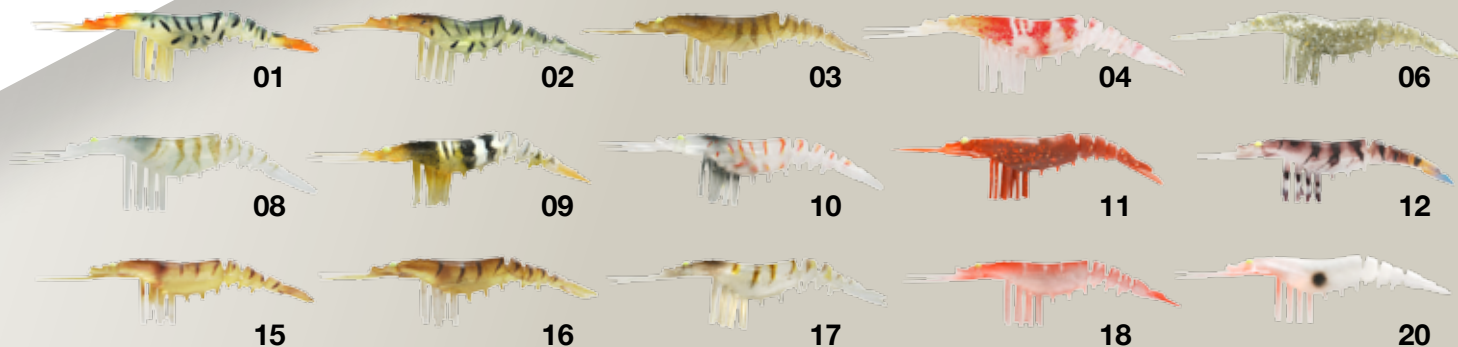

The Live Cherabin is a new model based on the already successful Live Shrimp which was designed for straight retrieve very close to the bottom. Live Cherabin is also constructed using a special rubber material featuring soft vibrating legs and feelers. The flexible abdomen of the Live Cherabin perform like a live-like shrimp. Twitching the Live Cherabin will mimic a fleeing shrimp, pauses will let it sink head first to the bottom again triggering strikes.

ZEREK LURES

An explosive take followed by a powerful run is a thrill many anglers seek when targeting large predatory fish. The harsh bluewater conditions and high-octane levels of adrenaline charged action demand only the best lures fitted with the best hardware. All Bluewater Craft Limited Lures are designed for the purpose of outlasting repeated strikes from toothy and hard fighting predators without compromising on functionality. A potent concoction that epitomizes supreme saltwater seduction.

BWCL ZAPPELIN

The Zerek Zappelin imitates a baitfish on the surface. It features a hydrodynamic body made from ABS and wire through hook hangers. Weighing in at 57 grams, the floating stickbait has great castability. Most effective with the sweep and stop retrieve; the bubble trail produced provokes the curiosity of the targeted species while the realistic wobbling action triggers their predatory instincts.

ITEM	TYPE	SIZE(mm)	WEIGHT(g)
781-BWZP160F	TOP WATER	160	57
781-BWZP220F	TOP WATER	220	125

Through Wire Design

BWCL THERMITE

Made from ABS and utilising “through wire” hook hanger construction the Thermite is built for harsh saltwater casting into topwater feeding frenzies.

Thermite features a proven cup face that displaces water effectively on the surface and leaves nice bubble trails every time it dives.

ITEM	TYPE	SIZE(mm)	WEIGHT(g)
781-BWCLTM140	TOP WATER	140	57
781-BWCLTM180	TOP WATER	180	90

Through Wire Design

BWCL PELAGICZ

Made from ABS and utilising “through wire” hook hanger construction the PelagicZ is built for harsh saltwater trolling conditions targeting trophy bluewater speedsters.

The PelagicZ features life-like detailing of common bait fishes and weight balanced for stability throughout various trolling speeds. PelagicZ is available in 2 sizes with different range of diving depths.

ITEM	TYPE	SIZE(mm)	WEIGHT(g)	DEPTH(m)
781-PZ140	TROLLING	140	50	6-8
781-PZ180	TROLLING	180	75	8-10

Through Wire Design

BWCL CAVALLA

Made from ABS and utilizing “Through Wire” hook hanger construction the Cavalla is built for harsh saltwater casting targeting King Mackerel and Tuna.

The Cavalla features highly reflective baitfish colours weighted for fast sinking and balanced to suit fast retrieval.

ITEM	TYPE	SIZE(mm)	WEIGHT(g)
781-BWCV115FS	SINKING	115	45

BWCL SPEED DONKEY

The Speed Donkey is Zerek Innovation's latest addition to its trolling range. It is made from ABS with "through wire" construction to withstand repeated strikes from the toughest predatory fish. The 140mm, 39g lure is well balanced for stability and tracks true. It has a narrow bib design that creates a tight wobbling action and enables the lure to dive to depths of between 2-4 meters. The streamlined body design combined with high quality finishing allows for a natural and realistic presentation that predatory fish will find hard to resist.

ITEM	TYPE	LENGTH(mm)	WEIGHT(g)	DEPTH(m)
781BWSD140	TROLLING	140	39	2

BWCL CHILLI PADI TG

Tungsten is hard also remarkable is its high density of 19.3 times that of water, comparable to gold, and much higher (about 1.7 times) than that of lead. Hence it is the ideal material for manufacturing Jigs where faster sink rate and smaller physical size is paramount.

Zerek Chili Padi TG sinks much faster compared to lead jigs enabling more precise presentation. Its unique shape produces an erratic fall triggering strikes.

ITEM	TYPE	WEIGHT(g)
781-BWCLCPTG10	JIG	10
781-BWCLCPTG18	JIG	18
781-BWCLCPTG28	JIG	28
781-BWCLCPTG36	JIG	36

BWCL STEP SLIDER

Only high density lead is used in all Zerek jigs. The centrally weighted Zerek Step Slider is balanced based on the center of gravity of its form factor enabling the jig to fall in a fluttering action as it sinks. This action is proven to be suitable for targeting species with slower reaction strikes.

ITEM	TYPE	WEIGHT(g)
781-BWCLSS20	JIG	20
781-BWCLSS25	JIG	25
781-BWCLSS30	JIG	30
781-BWCLSS40	JIG	40
781-BWCLSS50	JIG	50

BWCL SPEED SLIDER

The center of gravity of the Zerek Speed Slider is tuned towards the bottom enabling the jig to fall faster as it sinks. Fast darting action can be easily imparted to the jig during down stroke motion. Its design is proven to be suitable for targeting species throughout the entire water column.

ZEREK

MARSH SLIDER EXPEDITION SHIRT

Cotton with its natural texture and aesthetics make it the fabric of choice for many anglers. But cotton has shortcomings - garments tend to crease and shrink and colors fade. Zerek uses SUPPLEX® fabrics, a family that combines the traditional appeal of cotton and the performance benefits of modern fiber technology.

SUPPLEX® fabrics are:

- Fully Breathable
- Able to Hold their Shape
- Quick dry
