SOUTH AUSTRALIA — THE HOME

BY AUSTRALIAN FIELD TESTER SHANE MENSFORTH

Having grown up in various parts of South Australia, I have been fortunate enough to experience some of the country's very best snapper fishing over a lengthy period. Our state enjoys the reputation of being Australia's snapper capital, attracting thousands of visiting anglers annually and forming the basis of a thriving recreational fishery. Big snapper are truly wonderful fish, and I'll never tire of catching them.

For most of my fishing life, catching snapper was a bait only affair. Big snapper (or 'reds' as they are more commonly known here) are suckers for a whole squid head, fish fillet or fresh pilchard, and for decades these were the baits we all used to catch them. However, things have gradually begun to change recently, with more and more South Australians now turning to lures for their big snapper fix.

Looking back over more than 40 years of snapper fishing, both the equipment and techniques have undergone steady, but significant refinement. Lines have got lighter, reels have got smaller and the overall approach to catching these great fish has become more refined. One thing has remained constant throughout, however — the need for tough, reliable terminal tackle.

Back in the 'good old days' of snapper fishing here, the standard hook was Mustad's time-proven 92554 Suicide pattern, usually in 4/0 up to 8/0. Naturally, these hooks were around long before the chemical sharpening process revolutionised our fishing, and they needed touching up with a file prior to use. Once the points had been honed, however, the 92554s were close to the ultimate weapon for the super strong,

particularly corrosion resistant for their time, and their offset gape facilitated good, clean hook ups. I used them exclusively, both out in the boat and from many land-based locations such as rock

ledges, jetties and even beaches on occasion.

When we entered the wonderful world of chemically sharpened hooks, however, Mustad took things to a whole new level with the brilliant (and aptly named) Big Red. This hook comes with all the good features of the perennial 92554 Suicide, but also offers the advantage of a chemically sharpened point. Available in a range of sizes to cover all snapper fishing situations, Big Red quickly became a market leader, and still enjoys terrific sales success across the country.

Another of Mustad's real winners for the keen snapper angler is Big Gun, which also emerges from the packet with a needle-sharp point and a slightly more subtle offset. I know many anglers who now actually prefer Big Gun, remarking that it seems to offer an even better bite to hook-up ratio than its red cousin. I'm happy to have either of these beauties connecting me to that giant snapper, as I'm always confident in their strength and holding power.

As is the case with most of South Australia's most successful snapper anglers, I like to use a pair of hooks snelled close together rather than just a single. Dual hooks enable large baits to be presented naturally, and also minimise the possibility of dropping a decent fish. Exactly how far apart the hooks are snelled depends entirely on the bait used, but it's generally between 4-7cm. I prefer to use leader material of around 20-25kg breaking strain, which provides a good measure of strength and durability.

Baiting up demands considerable thought, as the inside of a big snapper's mouth is hard, bony and generally difficult to penetrate. It's imperative to expose hook points and barbs, so I'm always certain to secure the bait with all the sharp bits well clear of the squid, fish fillet or pilchard before casting. This is where chemically sharpened hooks like Big Red and Big Gun really come into their own.

One of the biggest snapper I've ever caught — genuine 15kg specimen — took a live slimy mackerel fished down deep on a dual hook paternoster rig. Chasing reds on livies isn't widely practised here, but if the snapper are big and in an aggressive frame of mind, it's a deadly technique. In several of the areas

OF MONSTER SNAPPER

I regularly use live baits the current runs quite hard, necessitating heavier sinkers than usual and a different hook choice.

Because offset hooks like Big Red and Big Gun can sometimes cause live baits to spin in the tide, I instinctively opt for the Hoodlum. Probably my favourite Mustad pattern of all, Hoodlum is even stronger than the others. It's shorter in the shank, wider in the gape and straight rather than offset, which combine to make it one of the best live bait hooks ever produced. I also use Hoodlum for heavyweight sportfish like yellowtail kings, samson fish and southern blue-fin tuna, where absolute strength and reliability are mandatory.

Despite the fact that the snapper-on-lures revolution kicked off on Australia's east coast, it is now a widely practised technique in my home waters. Soft plastics were the first lures to capture the imagination of local snapper specialists, and these are still extremely popular here. However, slow jigging is now catching on as well, offering a range of choices for different situations. I love using plastics, especially in relatively shallow water, but will often switch over

to metal jigs if the tide is running and I need to get down to the fish in a hurry. I've been trialling some prototype versions of Mustad's new tandem hooks designed specifically for slow jigging with metal lures, and can report that the hook-up and retention rates are right up there with the best I've ever experienced.

Mustad Darter jig heads, which emerged a couple of years ago,

have certainly added a new dimension to the way I go snapper fishing with soft plastics. Because big snapper crush crabs, shellfish, urchins and similar hard food items for a living, their jaws are incredibly powerful. Throwing down a soft plastic on a sub-standard jig hook can often end up in disaster, as many anglers have discovered since the lure fishing trend caught on here. There's nothing worse than hooking that snapper of a lifetime, playing it skilfully to the boat and then losing it centimetres from the net due to a bent or crushed hook. High quality jig hooks are a must – I can't stress this strongly enough!

Mustad's Darter jigheads come with super strong, chemically sharpened hooks that simply won't let you down – regardless of the size of the snapper you're connected to or the tackle you're using. The angled shape of the Darter head also helps out by imparting an erratic action to the lure as it's retrieved – something traditional round heads simply don't offer.

I like to carry a selection of Darter jigheads on board to suit changing tidal or wind conditions. On a still day with minimal tide run I'll usually opt for a 14 or 17gm head on a 7/0 hook when fishing with 12-16cm long plastics. I find that the corrugated 'collar' behind the Darter head holds the plastic firmly and securely. If there's a bit of wind or tide to consider, I'll generally up the ante to a 21 or 28gm Darter to ensure the lure gets down into the strike zone and maximise chances of a solid hook up. It's handy to have a combination of several head weights and hook sizes at your disposal to suit what's happening on a given day.

So, whether it be traditional bait fishing or the currently popular lure fishing, Mustad has Australia's snapper specialists pretty well covered. I love hopping a plane to head off in pursuit of barramundi, marlin, giant trevally or similar tropical sportfish, but I'm always happy to come home to the country's best big snapper fishery – right here on my back doorstep. You can bet Mustad will be right there with me, wherever I choose to wet a line!

SPECIALITY: MUSTAD BIG GAME HOOKS

Big water. Big Fish. If allowed, they will punish you. Mustad Big Game hooks have helped subdue more Billfish, Tuna, and Wahoo than all other brands combined! Fish with Mustad. Fish with confidence.

Mustad  SIGNATURE
FLY HOOKS

PRECISION TO PERFECTION

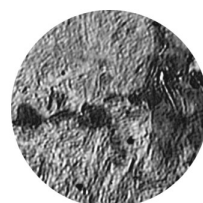

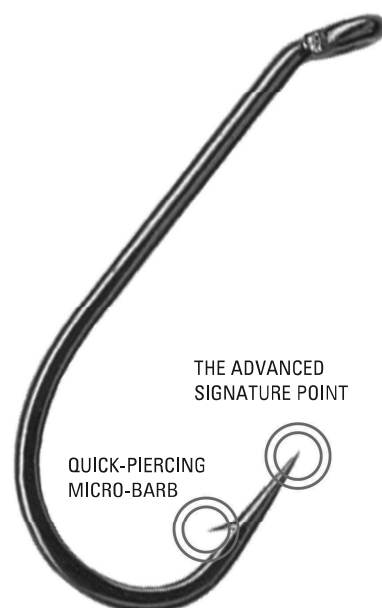

Every Mustad Signature pattern is specifically designed with consistent hook gap, bend, wire diameter and shank length for precise scaling that no other hook can match. Also, you can create accurate development stages, making sure you have just the right fly for just the right time.

CHEMICALLY SHARPENED NEEDLE POINT

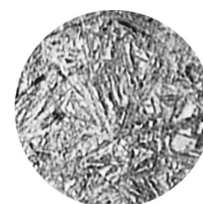

Using the latest technology, we've developed the sharpest hook possible. You can count on the hook instantly penetrating and keeping your success on the line every time. Micro-Barbs can be easily pinched down without damaging the hook for barbless applications.

30% STRONGER FLY HOOKS

Our three-stage Nor-Tempering™ process creates a fine grained, ultra-strong microstructure to make sure your hooks always hold up to tough fish.

CONVENTIONAL TEMPERING

NOR-TEMPERING™

The Clouser Minnow was designed with the goal of making a pattern that would represent a fleeing bait fish. The key to achieving this is locating the eyes in the right position on the hook. When you retrieve the fly it rises and when you pause, it falls or dives. It never stops moving.

SPECIALITY: FLY HOOKS

The most technically advanced hooks on the water.
Together with the world's top fly tiers, we've created the sharpest, strongest hooks with exact proportions. Technology means tight lines..

CLASSIC RANGE HOOKS

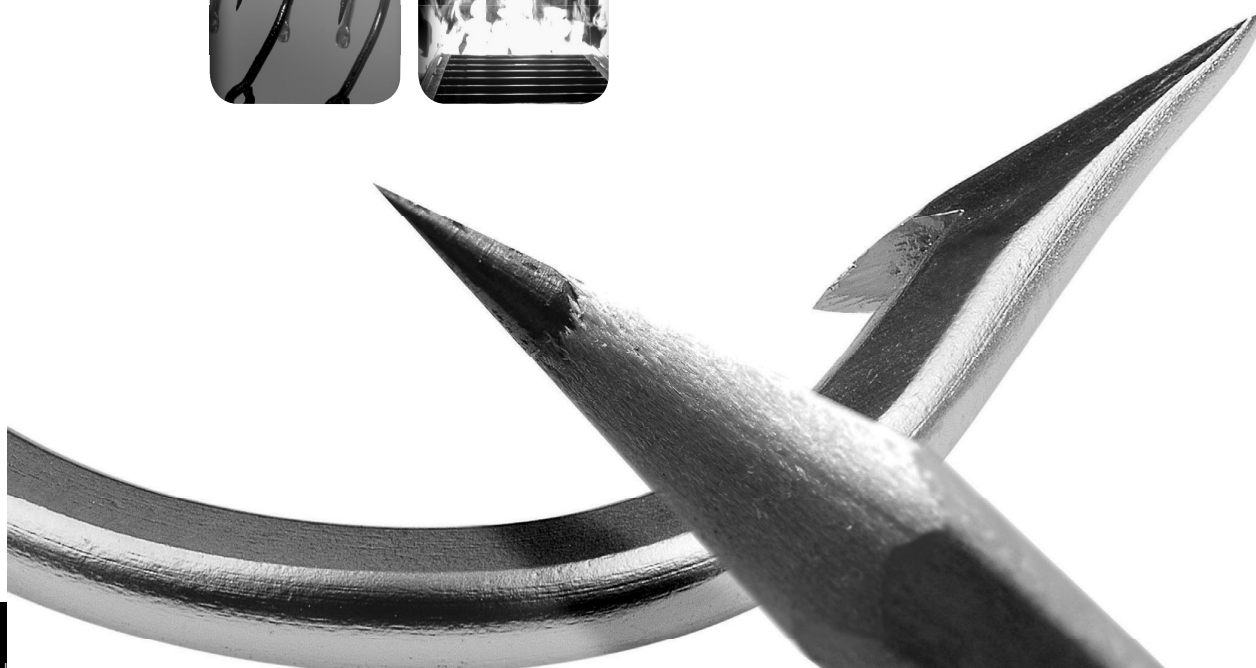

THE BEST VALUE HIGH QUALITY FISHING HOOKS OUT THERE!

The most important thing about a fishing hook is its ability to catch fish, and this is of course also the most important thing for Mustad when designing and developing a hook pattern.

The Mustad Classic Range offers the biggest selection of fishing hooks with unmatched strength at the very best value for the money. Our unique three-stage computer controlled tempering process transforms the hook into a fine grained, ultra strong microstructure. This increases strength up to 30 per cent compared to conventional tempering methods. However, it's not only strength that is important in this process; we need to be in control of brittleness and flexibility as well. Our superior technology allows us such control of the final outcome.

Mustad hooks feature a wide range of Colours and finishes, from black nickel and gold to bronze. The special coatings have been developed to suit the various types of fishing.

Don't be fooled by the price of the Mustad Classic Range these hooks are of high quality wire! All hook wires are individually sized for each hooks size and made in Norway.

MUSTAD 4202 OPEN EYE GANG HOOKS

Mustad's open eye gang hooks have been the first choice of Australian tailor anglers for more than 40 years. Designed for use with whole pilchards, these hooks created a unique style of fishing which still has thousands of followers today.

The Mustad 4202D has a special open eye which allows 3 or 4 hooks to be ganged together by using pliers or other suitable tools to close the eye of one hook around the next. The number of hooks in the gang will be determined by the size of the pilchards or other baitfish used. The Mustad 4202D has a turned-down eye which, when assembled, produces a gang that lies straight. Although primarily designed for tailor, gangs of 4202D hooks can also catch Australian salmon (kahawai), bream, mullet, snapper and many other species. Size range is 1/0 to 6/0.

THE MUSTAD 4202BN

Now, Mustad has introduced an improved open eye gang hook, the 4202BN. It features a special smooth black nickel finish which allows the gangs to move more freely and penetrate better on hookups. They also feature Mustad's MT Point for improved sharpness and a modified eye for easier closure.

Mustad also offers pre-assembled gangs in various configurations, including swivel gangs. See the Terminal tackle section, page 49.

WARNING:

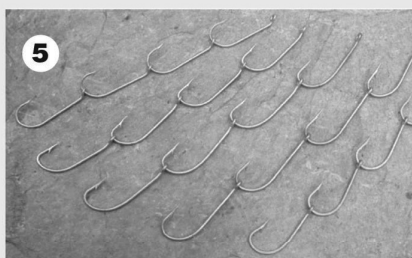

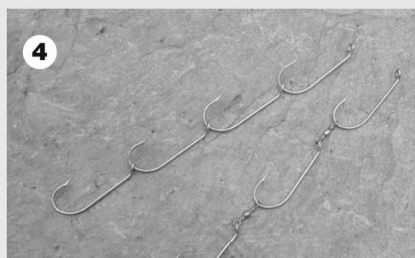

Always use eye protection when ganging hooks.

CAPTIONS AND SEQUENCE FOR MUSTAD GANG ASSEMBLY SHOTS

1. and 2. (Can be alternatives both shots are not needed). Making a swivel gang by closing the eye of the hook around the swivel.

3. The right tool is a big help when making gangs from open eye hooks. In the absence of good pliers, a crimping tool can do the job.

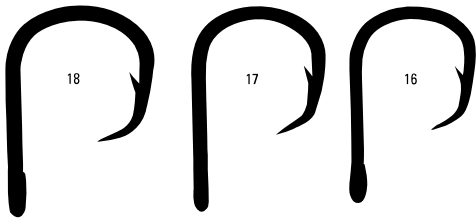

4. On the left is a conventional 4-hook gang made from Mustad 4202D's. On the right is a 3-hook swivel gang, in which three hooks do the work of four with better hooking and fish holding power.

5. A gang of gangs, from left: A 4-hook gang made from Mustad 4202D open eye hooks. A 4-hook gang made from closed eye Mustad 8260D Limericks size 4/0. The shank has been slightly bent below the eye to counteract the bowing effect. The same gang in hook size 5/0. Limerick gangs suit those who prefer straight pointed hooks. A gang of Mustad 4200's with the eyes kept straight. Some anglers prefer it this way. A gang of Mustad Tarpons with the eyes kept straight, apopular gang in WA.

TIPS FOR GANGING

When assembling gangs, the aim is to create a round eye shape and avoid squashing the eye from the sides. Many anglers prefer grooved tools such as Sargeants pliers for this purpose. A crimping tool can also be useful, using the cavities to create a round eye shape.

SUBSISTENCE HOOKS

When the battle starts, it's good to be on line with Mustad. The rigors of ocean fishing demand special tools, with no room for second best. In countries all over the world, generations of dependable duty have helped Mustad Salt Water Hooks mean real value in any language. They're formed from strong high carbon steel, then specially tempered to bend without breaking - all to endure when others fail.

TOOLS MUSTAD TOOLS. SOMETHING YOU CAN DEPEND ON

Time spent on the water is precious. In order to do it right, you need gear that will stand up to the fish and the conditions. Mustad's tool line-up consists of many must have's in an anglers arsenal. Be it pliers to help release a fish or a fillet knife to bring one home for dinner, we have you covered.

4" BAIT KNIFE - REF. MT001

This 4" bait knife is constructed with high quality materials. The blade is made with high grade German stainless steel that is with DuPont™ Teflon® which adds corrosion resistance and allows the blade to slide effortlessly through the bait. The handle features an ergonomic comfort design with durable polypropylene with soft, no-slip grip. Also includes a durable, rigid safety sheath with thumb lock and line cutting channel.

7" FILLET KNIFE - REF. MT002

8" FILLET KNIFE - REF. MT003

These fillet knives are constructed with high quality materials. The blade is made with high grade German stainless steel that is with DuPont™ Teflon® which adds corrosion resistance and allows the blade to slide effortlessly through the fillet. The handle features an ergonomic comfort design with durable polypropylene with soft, no-slip grip. Also includes a durable, rigid safety sheath with thumb lock and line cutting channel.

8" SERRATED FILLET KNIFE - REF. MT004

This 8" fillet knife is constructed with high quality materials. The fully serrated blade is made with high grade German stainless steel that is with DuPont™ Teflon® which adds corrosion resistance and allows the blade to slide effortlessly through the fillet. The large handle features an ergonomic comfort design with durable polypropylene with soft, no-slip grip. Also includes a durable, rigid safety sheath with thumb lock and line cutting channel.

9" BONING / FILLET KNIFE - REF. MT005

This 9" fillet knife is constructed with high quality materials. The large boning style blade is made with high grade German stainless steel that is with DuPont™ Teflon® which adds corrosion resistance and allows the blade to slide effortlessly through the fillet. The large handle features an ergonomic comfort design with durable polypropylene with soft, no-slip grip. Also includes a durable, rigid safety sheath with thumb lock.

6.5" HYBRID PLIERS - MT007

Built with strength and weight in mind, these pliers are produced with high quality stainless steel and aluminum. Stainless steel with corrosion resistant rainbow Titanium. In order to reduce total weight, the handles are made with aircraft grade aluminum. These pliers also feature replaceable tungsten- carbide side cutters, a lanyard and durable rubber holster.

HEAVY-DUTY 6" PLIERS WITH SHEATH - MT009

Durable and functional, these pliers are built to perform. Constructed with stainless steel, the pliers are then with black titanium nitride for increased corrosion resistance. They feature textured jaws for a more secure hold, built-in crimper, split-ring tool, lure tuner grooves and a mono/wire cutter. They also feature durable, soft-grip handles for comfort and nylon sheath with Velcro closure and belt loop.

HEAVY-DUTY 8" PLIERS WITH SHEATH - MT010

Durable and functional, these pliers are built to perform. Constructed with stainless steel, the pliers are then with black titanium nitride for increased corrosion resistance. They feature textured jaws for a more secure hold, built-in crimper, lure tuner grooves and a mono/wire cutter. They also feature durable, soft-grip handles for comfort and nylon sheath with Velcro closure and belt loop.

HEAVY-DUTY 11" LONG REACH PLIERS - MT011

When dealing with toothy fish, you need longer pliers to stay safe. These extra-long reach pliers are constructed with stainless steel and then with black titanium nitride for increased corrosion resistance. They feature textured jaws for a more secure hold and durable, soft-grip handles for comfort.

HEAVY-DUTY WIRE/ LINE CUTTERS - MT012

Durable and functional, these cutters are built to perform. Constructed with stainless steel, the cutters are then with black titanium nitride for increased corrosion resistance. They feature hardened jaws for a longer cutting life. They also feature durable, soft-grip handles for comfort and nylon sheath with Velcro closure and belt loop.

HEAVY-DUTY CRIMPER/CUTTER - MT013

Durable and functional, this crimping tool is built to perform. Constructed with stainless steel, then with black titanium nitride for increased corrosion resistance. They feature hardened jaws for increased durability with 2 side-cutters and lockable spring-loaded action. They also feature durable, soft-grip handles for comfort and ease of use.

SALTWATER GRADE MECHANICAL SCALE
25LB - MT016
50LB - MT017

Highly accurate with stainless steel spring and hook. Body is lightweight and durable anodized aluminum. Sliding marker records weight after fish is removed from the scale. Easy-grip rubberized handle.

24 PC BUCKET 4" BAIT KNIFE
- MT020

This 4" bait knife is constructed with high quality materials. The blade is made with high grade German stainless steel that is with DuPont™ Teflon® which adds corrosion resistance and allows the blade to slide effortlessly through the bait. The handle features an ergonomic comfort design with durable polypropylene with soft, no-slip grip.

ALUMINIUM LIP GRIP W/SCALE
- MT021

This fish gripper is constructed with a combination of aluminum and stainless steel for lighter weight and performance. Jaws open easily with the spring trigger and when released, fish are held firmly. Handle features soft-grip foam and spring scale goes to 50 pounds. Includes a lanyard.

6" FILLET KNIFE 24 PC BUCKET
- MT022

This filleting knife is constructed with high quality materials. The blade is made with high grade German stainless steel with DuPont™ Teflon® which adds corrosion resistance and allows the blade to slide effortlessly. The handle features an ergonomic comfort design with durable polypropylene with soft, no-slip grip.

FINESSE MULTIPLIER
- MT023

Multi-function pliers in stainless steel. Excellent line cutter for wire and mono lines. Split rings and hook removal. Two built-in-knives.

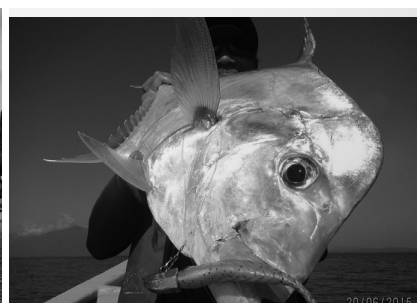

FINESSE CAMOUFLAGE MULTIPLIER
- MT023-C

Multi-function pliers in stainless steel. Excellent line cutter for wire and mono lines. Split rings and hook removal. Two built-in-knives.

BRAID SCISSORS 24PC BUCKET
- MT024

These 4.5" shears are fantastic for cutting braided line as well as mono and fluorocarbon. Made of stainless steel with soft plastic handle.

MICRO BRAID SCISSOR
- MT025

Ultra light aluminium construction designed to cut braided fishing lines. With comfort in mind, the handles are molded of soft rubber. They also feature a sheath that the shears slide and lock into with an attached lanyard.

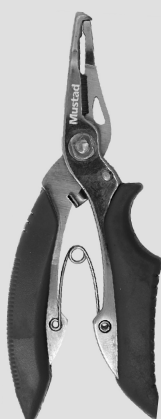

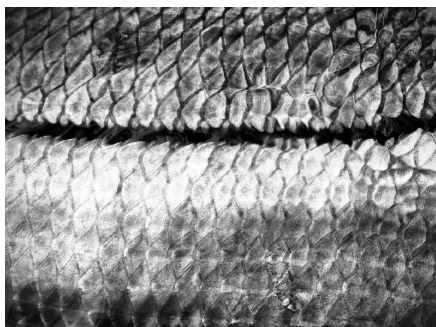

FEATHERWEIGHT ALUMINUM PLIER
- MT026

Lightweight and durable! Made from aircraft grade ultra-light aluminum that has been heavily anodized for greater corrosion resistance. Features stainless steel jaws and replaceable tungsten-carbide cutters.

6 PIECE KNIFE SET
- MT027

This compact kit contains three razor-sharp stainless steel knives, a pro-style sharpening tool and a durable polymer fillet/cutting board. All items snap into custom molded pockets in rugged carrying case for easy storage.

BRAID CUTTER & SPLIT RING PLIER 5"
- MT028

Durable stainless steel Finesse split ring opener. Soft touch handle, easy cutting scissors, spring-loaded & Safety latch.

BRAID CUTTER & SPLIT RING PLIER 5"
- 24 PCS BUCKET
- MT029

24 Pcs bucket of durable stainless steel Finesse split ring plier 5". Soft touch handle, easy cutting scissors, spring-loaded & Safety latch.

BAIT SCISSOR
- MT030

A must have in your saltwater and predator fishing kit. Cuts chum and bait with ease, Stainless Steel construction, and it floats!

6" FILLETING KNIFE WITH SPOON
- MT031

This 6" Knife with spoon is a great choice for pro anglers. The ultra sharp knife glides effortlessly through the fish and the spoon removes the bloodline. Easy and fast. The blade is made with high grade German stainless steel with Dupont™ Teflon® which adds corrosion resistance and allows the blade to slide effortlessly. The handle features an ergonomic comfort design with durable polypropylene with soft, no-slip grip. Also includes a durable, rigid safety sheath with thumblock and line cutting channel.

FILLETING PRESENTATION SET
- MT032

Limited edition Mustad Ocean Crystal kit presented in aluminum box. Ergonomically designed knife to provide the ultimate in comfort and ease of use. Single blank of high-carbon German stainless steel with titanium coating.

ULTRA STRONG ALUMINUM PLIER
- MT033

This 7.5" Lightweight and durable! Made from aircraft grade ultra-light aluminum that has been heavily anodized for greater corrosion resistance. Features titanium stainless steel jaws and replaceable tungsten-carbide cutters. Includes custom rubberized grip and coiled tether with clasp to keep tool handy.

PROFESSIONAL FILLET KIT
- MT034

Features fillet knife with razor sharp, high grade stainless steel blade bonded with an ergonomic, rubberized grip; rigid safety sheath with a pivoting belt holder; knife sharpener; durable nylon knit glove and stainless steel, scent removing washing stone.

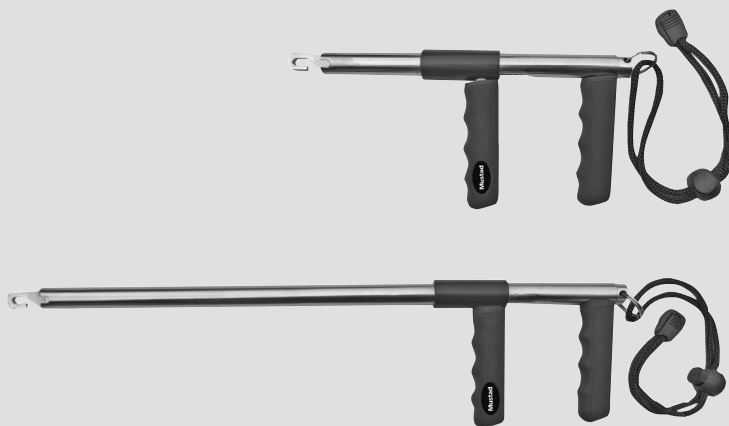

6" FILLET KNIFE - TITANIUM - MT035
7" FILLET KNIFE - TITANIUM - MT036

Rainbow titanium coating. Ergonomically designed to provide the ultimate in comfort and ease of use. All are precision forged from a single blank of high-carbon German stainless steel, then skillfully honed to hold a razor sharp edge cut after cut. Models include different handles designed to provide firm grip even when wet.

BRAID CUTTING SHEARS
- MT037

These 4.5" shears are fantastic for cutting braided line as well as mono and fluorocarbon. Built with high grade German stainless steel, they are designed to last. With comfort in mind, the handles are molded of soft rubber. They also feature a plastic sheath that the shears slide and lock into with an attached lanyard.

FISH DEHOOKER 7.5" TRIGGER STYLE - MT038
FISH DEHOOKER 14.5" TRIGGER STYLE - MT039

The Mustad Fish Dehooker tool makes hook removal easy and safe. With normal pliers, hook removal can be dangerous with toothy fish. This longer hook remover keeps your hands away from those sharp teeth and keep your fingers safe. When releasing fish its best to keep the fish in the water. The length of Mustad Fish Dehooker makes it easier and safer to remove the hook while the fish is still in the water.

PREDA PLIER 11"
- MT040

"Mustad Preda Plier" are the ultimate tool for the engaged predator angler. The tool provides a large spectrum of features that allows the angler to build better rigs and remove hooks from that toothy predator with ease, all with the same tool. Carefully designed using only the best materials available it is the best tool option for any predator anglers use – It is your personal weapon!

INCREDIBLE STRENGTH, CONTROL AND SHOCK RESISTANT
CLASSIC

THOR MONOFILAMENT LINES

The Mustad Thor Monofilament Lines are made from top grade copolymer nylon and with its unique combination of proprietary materials, they are able to provide maximum strength and also maintain its pliability. The copolymer nylon formula offers added toughness and excellent abrasion resistance.

The Mustad Thor is designed to be a true all around high performance line. It is smooth and exceptional good for casting with less twisting. Superior strength and toughness with easy casting!

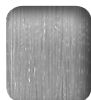

WISH MONOFILAMENT LINES

The Mustad Wish Lines are formulated with specific formula giving flexibility, extra sensitivity without losing strength. The handling and durability is amazing and will make your fishing day easier. Mustad Wish Lines gives better casts with ease thanks to the smoothness and less twisting. The formula also has shown proven toughness and great abrasion resistance. All German materials (BASF). Unique Mustad surface treatment.

A true all around high performance next generation monofilament nylon line the might make your wish come true.

THOR BRAIDED LINES

Made from super high strength Spectra fibers. An exclusive 4 strand NR braiding process gives the Mustad Thor Braided Lines a thin, round & smooth profile. This makes it more smooth and quiet in the guides. You will achieve longer casts and more easy handling on the reel. Proprietary DuPont™ coating provides excellent abrasion resistance, while maintaining its superior strength and durability. Get improved sensitivity and more efficient hook-sets, try the Mustad Thor™ Braided Lines.

WISH BRAIDED LINES

Increase casting length, accuracy and reduce line vibration with the 100% Honeywell Spectra™ Fiber Mustad Wish Braided lines! Our unique & exclusive 8 strand braiding process produces a rounder, smoother, thinner braided line that handles amazingly effortless and quite. At the same time, ultra abrasion resistant and super-sensitive. A true all around high performance next generation line that might make your wish come true.

FASTACH™ WEIGHTS

The unique Mustad Fastach weight jigging system makes hook and bait changing quicker and easier out on the water. Simply twist off your hook for express bait changing out on the water. The Fastach jig system gives your bait super natural movements in the water and works on all modern soft baits, such as Shads, Shrimps and Tubes. Perfectly fitted with the Mustad Grip-pin series of hooks.

Packed 10 Blister per Outer

UNMATCHED STRENGTH AND QUALITY

Introducing the new Mustad range of precision made high quality terminals. Designed to last, nothing escapes! Made of the strongest stainless steel possible, assembled with surgeon precision and undergone intensive testing by machine and during heavy fishing. - We dare to say these items have unmatched strength.

JIG HEADS

Specially developed UltraPoint™ jig hooks.
The “head” is perfectly located on the hook angle,
to ensure best casting and lure playing.

- Black Nickel finish
- Strong and flexible wire
- Anti- corrosion coating on “head” and cones

JH32833 MUSTAD DARTER JIG HEAD

These brightly polished jig heads enhances lure presentation while their aerodynamic shape ensures minimal water resistance. The proven four step grip profile will lock your soft plastic lure in position, even after prolonged casting.

These jig heads are made using the 2 extra strong 32833NPBN UltraPoint jig hooks, guaranteed to give you both strength and sharpness. With hook sizes from #2 to #7/0 and weighing 1.5g all the way to 42g, we have you covered, be it fishing for breams using finesse soft plastics in the estuary or tossing that big swim baits for snappers in the reef.

JJ STYLE BW (BALANCED WEIGHT) JIGGING SYSTEM

BY JAPANESE FIELD TESTER JJ HAYASHI

Vertical jigging is an effective way of fishing because it

combs the different depths of the sea for predatory fish. Most people see vertical jigging as a strenuous form of jigging but it does not have to be so. With the correct equipment and technique, a different approach can be executed with equivalent or better results. Since 1992, I have been experimenting the use of a balanced weight for jigging and imparting the action to the lure /jig by means of the action from the rod tip. Throughout the years, I have no doubt improved the technique to what it is today.

Unlike conventional vertical jigging where the rod butt is usually tucked under the arm, the JJ Style BW jigging incorporates the use of a rod gimbal for support. The rod is stroked in a wide and relaxed motion, hence allowing the angler to enjoy jigging without tiring out. Different kinds of jigs and lures can be used in this technique, alongside a balanced weight that resembles a spreader and a fluorocarbon leader between 3 to 5 meters. This idea of JJ Style BW jigging was first inspired by the fishermen in Okinawa who had been using handmade balanced weight of around 1kg on tric reels when targeting tuna. This was however not suitable for sports angling and I went on to develop my unique JJ Style BW jigging technique. This must not be mistaken with another technique known as Ebing.

Soft plastic baits are most frequently used in JJ Style BW jigging technique and are deemed most effective, working even on slow days. I had however encounter success even when I tied on small metal jigs, hard body minnows and even poppers. A large variety of pelagic species often fall victim to this natural presentation, including Yellow Fin Tunas, Bonitos, Mahi Mahi, Wahoo and on a few occasions, Marlins! It is also not uncommon to encounter some

reef species as well as amberjacks when using the JJ Style BW jigging in deeper water.

The key advantages of the JJ Style BW jigging lie in the fact that the balanced weight allow the lure to be worked at a wide angle instead of a vertical 90 degree, hence alleviating the stress on the anglers' arms. Support from the gimbal allows the rod to be worked more efficiently, while the action of the lure can be easily imparted using the rod tip. Unlike vertical jigging where the jig has to be worked constantly to trigger strikes, in JJ Style BW jigging the soft plastic bait is presented horizontally and remains in the strike zone even when no action is imparted by the angler. As such the chance of getting a strike is substantially higher.

As I consistently make use of soft baits for this fishing technique, the choice of hooks becomes very important. I have tried many but have identified the Mustad 10829NPBN (Big Gun) model to be perfect for this application. This Ultrapoint hook with an offset point is the perfect balance between strength and sharpness. Due to its high quality, I do not have to compensate for strength by using a larger sized hook. This is especially important when small soft plastic baits are used to mimic small baitfish. During a strike the impact of hook setting is cushioned by the balanced weight so it is very important to

have a sharp and strong hook. I usually use this hook in sizes from 1/0 to 3/0 and have successfully landed Yellow Fin Tunas in excess of 20kg. For the JJ Style BW jigging, I have found that the tunas usually favour the long jerk action. By using the repulsive force of the rod tip, coupled with a slow and wide strokes, the chance of getting hit by tuna is greatly enhanced. I highly recommend this technique to anyone who wishes to target pelagic species using artificial lures, and especially to those who finds vertical jigging too taxing. FASTACH LEADER SYSTEM

Change your rig set-up in just a few seconds with the genius Mustad Fastach Leader System. A full range of carefully designed Rigs and Main Lines that all connects with a simple twist. All rigs are made on our premium Ultrapoint hooks. Main Lines and Rigs are supplied on practice foam boards to make life easier in the tackle bag. We take the big success from the Mustad Fastach to the sea angling world. Be effective and fish with confidence!

FTR - Lines are packed 10 blisters per outer.
FTL - Links are packed 5 blisters per outer.
